Subject: Missouri Agriculture Business Academy

Just received a call from Sarah Tyree of the Missouri Department of Agriculture. There is a Missouri high school program-Missouri Agri-Business Academy which teaches kids the relationships of agriculture to business. Tenth graders apply from all over the state and a class of 30-45 is in the program. They are seeking an opportunity to tour our Springfield plant and wonder how to go about doing that. The dates would be in the June 3-7 timeframe.

It seems to me this is perfect for Shared Solutions and good relation building for the State folks. As I told Sarah, I don't know what our policies are on tours and especially school kids. She understood, but stressed this is a big deal in Missouri. Can someone guide me on this. Thank you.
