P.O. Box 107,
Bridgetown,
Barbados.

Dear Mr. Stoute,

Marlboro - Style Flavour

Following our telephone conversation, I arranged for 1 litre of DENASH flavour to be despatched to you. Flight details have been telexed to you.

The application rate range for this flavour is 200 - 400ml/100Kg tobacco. I suggest you syringe inject a few cigarettes at differing application rates to assess the degree of effect you require before running a larger sample.

I hope this flavour proves of interest. If I can help in any further way please let me know.

With best wishes,

Yours sincerely,

C.R. JENKINS

cc. Mr. P. Murray, West Indies.
Mr. A.L. Heard.
