

NEW/11J/36J.

26th July, 1961.

Dr. S.J. Green.

PRESSURE VESSEL FOR VAUTIER

In view of the remaining programmed work for the VS/P.C.L. plant in Development Hall No. 1 and also the requirements of Dr. Hughes for batches of P.C.L. containing known quantities of additives, it would seem unwise to use one of the 100 gallon Digestors from the P.C.L. plant for Vautier.

I have obtained a quotation - attached - for a suitable vessel from Stainless Steel Vessels, London and I should be grateful if you would discuss this with Mr. Anderson so that I can take advantage of the seven weeks delivery promised by placing an early order.
