Good Evening Brian,

Attached is your weekly push report with product and market scripts for EXALGO, PENNSAID, DUEXIS and SUMAVEL for the December 28th data week. This file contains 13 weeks of Product TRx/aTRx and Market TRx data for each product by prescriber. Please note the column headers for the data dates.

Please also note that, until we complete the development of a manager version, District Managers will receive a single .Zip attachment containing the reports for their entire geography and will not be cc'd on individual emails.

This file reflects your current alignment and we hope this information will help you in your business and call planning for Q2. We will continue this report monthly as it is your only source for weekly SUMAVEL data. If you have any questions or would like any additional information, please feel free to reach out to Travis Moore or Jen Terp.

Best Regards,  
Jeremy Stamer
