Dear Fritz,

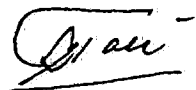

All seem to be organised very well for 7/8 May Meeting.

As discussed before please can we meet on the afternoon of 6th May to discuss the AGENDA for 7th, May. I would like a list with some details of New Members and their firms and how long they have worked there and any other relevant information for introductory remarks.

The New Secretary; have you any one in mind? Perhaps if he is not from FTR, we should elect him earlier in the meeting so that he can take adequate notes unless you can still do this for him. Otherwise we have the election at 8:50 and you stay in as Secretary for the meeting but at least he can also take notes in collaboration with yours.

Please be advised that Mrs Mary Toet is coming in her capacity of Chief Chemist and Group Quality Control Manager of Agricura - Agriconr. who do a lot of residue work on tobacco on new pesticide products. She was also 2nd in charge of the Tobacco Research Board Analytical Chemistry Department for 10 years doing most of the pesticide residues analytical development work.

Regards,

LEN TOET.
