

DICK

These overheads have been  
SO WELL USED - many times -  
in presentations. I've used  
them, Billy, Dan, Jack, Bruce,  
Cliff & Chuck!

Could you make an updated  
lighter & cigarette dwg?

2063899036

The lighter (to mkt version)  
looks like the image attached,  
long/skinny. Chuck/Grier or Pat Hayes  
can guide you about how the  
arrangement of components  
goes inside.

The cigarette needs to be updated  
to exclude the end filler, and  
to depict the new tipping paper art which  
makes the tip length look more proportional

to the overall cigt length also.  
There's a hollow filter component  
missing in this dwg.

Once you're done, we'll need at  
least 3 transparencies made of  
each. Right now, I'm not working  
against a date that I need them  
by, .... a couple (2-3 wks) would  
be fine. If that's a problem let  
me know. THANKS!!! Judy
