Smokers' smoke treatment attachment.

Appl: 31.8.67

Publ: 26.8.69

Prior: -

BENNETT, J.M. (Hozak, K.A.)

U.S. 3,463,166

A filter device for incorporating in a cigarette holder, or pipe consists of a tubular member having a fixed barrel portion, which has a plurality of cavities, which may be filled with flavouring medium such as menthol, or filtering material, or medicinal preparation, and an opposite rotatable end with a bore which may be selectively aligned with at least one, or possibly two, of the cavities in order to provide a variation of smoke treatment.
