Conversation w/ Walter Fink

6/2/92

All correspondence will be carried out through Frank Daylor.  
Walter Fink officially returns April 1 - Lot of Vacation - Will be gone Feb. 1, 1993  
- He has not had any input in training someone to replace him.

question this based  
on FEMA/FIRAC  
to

- Walter feels the draft of the EC Directive on Flavoring Substances which he sent to Frank is still the latest draft.

Draft

It is my understanding that the list sent by Walter is a list composed of Annex 1 and Annex 2. - It therefore includes substances with complete approval as well as provisional substances which must have additional approvals over a 5 yr period. -  
- Certain ingredients could drop from this list if not approved.

he should at least  
indicate if the  
draft will in  
fact include the  
substances not on  
the list sent by Walter

Walter believes it would be a good idea to include any sub substances (Flavoring substances) not found on the list. In other words, if you need to include substances which we currently have but are not on the list, they should be submitted soon.

## Conversation w/ Walter Fink

EC Tobacco  
Regulation will  
probably become  
a reality

VDC  
CACEM

Walter then discussed an EC Tobacco Regulation which he feels will eventually come into play. - Walter says that the industry representatives from all the member states is working toward a unified regulation. - There are working groups for Pesticides and for Additives. I asked Walter to please keep us up to date on this activity. He will but that the last 4 meetings were devoted to a Code of Practice (i.e. What is a cigarette, construction, etc.) When they turn their attention to an Additive List - we would get more information.

In summary — ① the Draft of the EC Directive on Flavouring Substances (Date 14 Feb 1992 III/3515/91/EN-RE13) is a chemical list of Annex 1 and Annex 2 (flavourings)

- ② There is an Annex 4 which should cover botanicals, etc. and foodstuffs. (Natural Products)
- ③ Should submit ingredients you would like to have on the chemical flavorings list
- ④ Send or take such a proposed list of ingredients to Walter or to someone who can add these to the EC directive.
- ⑤ An EC Tobacco Regulation should eventually become a reality.

x4 needs understood ) Walter said the list of mid-April (Draft on EC Flavoring Substances) in a chemical Flavoring list. Walter feels that materials of plant/animal origin (i.e. oils, extracts, gums, tincture, food products, etc) are covered in Annex 4 of the directive. Walter does not have an Annex 4 List at present - He will secure this and send to our attention.

I told Walter that Glycerol and PG were not included - He indicated these are not flavors and are included in different areas of the directive. I told Walter that there were other examples of ingredients not included on the list which we need coverage for use. - This list was not discussed at this time. However, after a final check against the latest draft, certain ingredients may need to be added through our channels in Europe.
