

Carroll - has Salitab products ~~test~~ in for Beta Methel Valenc (80 ppm in size press)

- Nic uptake **XB COORDINATOR'S EXTENDED MEETING**
Study (mg ~~now~~ - start 11/1)

Monday, October 5, 1992

AGENDA

Prepare Delta Research Pres for WMO by Monday

❖ Status Updates from Team Members: Nic Response Study should finish by early next wk. ~32 subj, 6 sess. ea - ~1000 samples -- 1st 450 samples done Oct 20 - last 500 done 11/13. Topline on 1st block by 1st week of Nov.

❖ XB Reviews with Dr. Ehmann - Today 10/5

John Reynolds

- John Robinson review 2 yrs of work (includes Gary Byrd's work)
- Brad - Vol Nic, WA filters, etc.
- Jimmy (Pigeon) - Wednesday 10/21
- wrap-up

D. J. Wilson

- Product Dev. D.J.W. & H.H.G.
- Process Dev. Sam
- Chemistry/Methods Bill

Joe & Sam came to see WMO re. elimination of LON facility. GCS has been working on high nic blends vs. 67-100 as an alternative. By end of 2/93 - should prove whether or not we can elim. LON process. ∴ work on Other Issues alternative strategies re. blending (Currently 3 lines operational) ~~Trying to shut down by end of '93~~

→ Research @ UNC-Warren - Hum. Resp. to Vapn Phases

1 wk without testing left - 3 diff. experiments

- 1) Sensitivity ~~to~~ Testing
- 2) Based on " " - mixtures for sens. testing. based on previous threshold.
- 3) Pre-tetrit. w/ LA + successively higher levels of nic.

So far - seems to be varying bet individuals

Brad - WA filters - ① various acids w/ B-3
② same acids vs. LA in blend - Shuts being made Oct for this

Bill - • Tommy needs to clog with SiO₂ and to control
• Bill has pentane extracted nic - waiting on LON. Tom has analyt. on Term Est. nic.
• " looking for sieves for the cavity filters
• Bill will check w/ Mike B. re. Vol. Nic. status
