Helmut

Sorry for the delay.

Here are the answers to your questions regarding 1R4F.

1. The filter ventilation is 30%
2. The filter RTD is 117 mm water, and the Total RTD (whole cigarette) is 134 mm water. I do not have information at this time about the deniers of the filter tow.
3. The butt length rule for FTC smoking is Tipping paper length + 3 mm. In the case of 1R4F, the butt length is 35 mm.

CWR means the total weight of the cigarette, filter included.

I hope this helps.

Ken
