Subject: Product monitoring report

We get a report from product monitoring tracking all product related issues. Below is a summary of the amount of product returned for the Apap/Codeine and HB/Apap solution recalls. I am surprised by the 80% response rate on the HB/Apap solution. The customers should have responded by now so it's possible they sold the product and do not have a response.

* Acetaminophen and Codeine Phosphate Recall (10/11/2012) Responses from 100% of the 42 consignees and an additional 1099 indirect customers. 3922 bottles have been returned to date.

* Hydrocodone Bitartrate and Acetaminophen Oral Solution (5/25/12) Responses have been received from 80% of the 46 consignees and 1338 indirect customers. 2267 bottles have been returned to date.
