PROTOCOL P 0500/3127

Comparative 90-Day Inhalation Study
(Nose-Only Exposure) with
Sidestream Smoke of
Standard Reference Cigarette 2R1
on Rats and Syrian Hamsters with Recovery Period
(PT)

PREFACE

=====

This protocol consists of an integrating protocol, which gives a general description of the complete project, and 5 subprotocols:

- (1) Analytical Chemistry
- (2) Immunology
- (3) Inhalation
- (4) Microbiology
- (5) Pathology

Each subprotocol has been worked out by the respective responsible team. Methods are described in detail in the respective subprotocol but not in the integrating protocol.

Remarks: This protocol (integrating protocol and subprotocols), including title page, contains 252 pages.
