## PATHOLOGY RECORD

REPORT 45.508

## APPENDIX I

Test No.: 23 Test Name: Dermal Carcinogenesis  
Sample No.: Fresh Species: Mouse Animal No.: 79-4547  
Sample Name: Deionized Water Strain: C3H/HeJ  
Treatment Level: 25 ul Sex: Male Age: Approx. 12 Mos.  
Fate: X D E EM Date of Death: 12-18-79  
Study Designation No.: 79-34

---

Clinical History

---

---

Gross Findings

---

Date of Necropsy 12-18-79 Time 11:15 a.m.

Skin and Lungs - No gross lesions.

Liver - Mildly autolytic.

Kidneys - Both affected. There are confluent, raised tan masses measuring approximately 4 mm in diameter surrounding the hilus and extending to the lesser curvature of the kidneys.

Urinary bladder - Autolytic.

Accessory sex organs - Autolytic.

No other gross lesions.

Prosector DRM

---

Microscopic Findings

---

Skin - No significant lesion.

Liver - No significant lesion.

Seminal vesicles and Prostate - Inflammation, subacute, diffuse, marked.

Kidneys - Pyelonephritis, suppurative, bilateral, multifocal, marked to severe.
