Subject: RE: New WSA project: Mouse Lung Tumorigenicity Modell with Mainstream Smoke

Dear Valerie,

The new WSA project is a direct follow-up project to the A/J Mouse project (N0 1176). Therefore it is more useful to discuss the new project (NO1399) and the A/J Mouse study (N01176) one after another. ✓

Best regards,
Walter

Dear Walter:

I spoke with Loreen. We will add this project to the agenda for Tuesday's project review. Since it's prioritization has not yet been determined (critical vs. priority vs. secondary, etc.), I will place it at the end of the Cancer projects with the expectation that we will ask for input on its priority during the review.

Best regards,
Valerie

Dear Walter:

I am also unsure as to whether this project will be covered, however, I will discuss it today with Loreen and let you know.

Best regards,
Valerie

Dear Valerie,

please find attached by presentation for the WSA project meeting on 'Mouse Lung Tumorigenicity Modell with Mainstream Smoke' (project number 1399). Since this new project isn't mentioned on the meeting agenda, I'm not sure if we will discuss it.

Best regards
Walter

Dear Walter:

The new project has been entered into the WSA tracking database. The project number assigned is N01399.

Best regards,
Valerie

Dear Loreen and Valerie:

Please find attached below a project sheet on a new project, which was agreed on in Rick's staff meeting yesterday. The costs for the external part of this study had been budgeted in the INBIFO budget.

Best regards,

Hans-Juergen

Hallo Hans-Jürgen,
anbei schicke ich Dir den Vorschlag zum neuen WSA-Projekt "Mouse Lung Tumorigenicity Modell with Mainstream Smoke". Wenn Du mit dem Projekt-Plan einverstanden bist, dann schicke ihn bitte weiter an Valerie King.

Gruss Walter
