Subject: RE: Mainstream CO Method

Charlene,

If some of your comments to my suggestions are incorporated into the method, it would clear up how the CO number is obtained. As it stands, a lot is left to the imagination of the reader. Maybe it would be a good idea to have a different reviewer, someone knowledgeable in both smoke analysis and NDIR, participate in this process (say Jim Lyons-Hart or Susan Plunkett). I need to move on to my main responsibilities in 7R5.

Milton
