Leo G. Abood, Ph.D.
University of Rochester
Medical Center
Department of Pharmacology
601 Elmwood Avenue
Rochester, NY 14642

Dear Leo:

Enclosed is the Longenecker manuscript on nicotine and release of prostacyclin from rhabdosarcoma cells. The levels of nicotine are quite high and I question the relevance to human exposure levels. Please do not cite or circulate the manuscript as it was sent to me by Gesina Longenecker as an unpublished preprint.

Thank you for agreeing to review the chapter from the Surgeon General's Report.

Best regards,

A handwritten signature in dark ink, appearing to read "Neal", is written above the typed name.

Neal L. Benowitz, M.D.
