Subject: Spotted CAMEL Lights (3/5/84)

Date: March 7, 1984

To: Dr. Bert M. Gordon

From: Sterling White

At your request, we analyzed the spotted CAMEL Lights. Upon examining the IR spectra, apparently the spots were identified as a paraffin-type oil. They resembled several reference spectra of the following oils:

EP #4 Oil
Mangnus Kling Oil
Auto Transmission Fluid
GP Oil 64-M
WF-68 Capella
EGL #2
EGL-EP Oil
