From: Haussmann, Hans-Juergen  
Subject: Canadian Expert Committee Submission  
Dear Jill:

Please forward this message and the attached documents to Richard Carchman.  
Thank you!

Richard:

You will find attached the manuscript and the slides for the presentation as amended during the last couple of days. Some more emphasis was put on the concept-driven testing approach, as you already saw the draft. Chapters showing the discriminatory power of some of the tests as well as Beta data as examples of applying these tests to an 'innovative tobacco product' were added. The slides already include the figures, but I still have to incorporate these into the manuscript.

I will complete the latter today and then forward the files to Denise for further editing as necessary. I will also forward to Denise the original files with the figures. On Friday 11th, I will be in a more or less all-day meeting with the chemists. On Sunday 13th, I will leave for vacation in Germany (Personal Confidential, no fax, no voice mail, until Friday 18th). I'll be back in the office on Monday 21st.

(The last two files might be printed in color.)

Enjoy Switzerland

Hans-Juergen
