Subject: RE: Extra PMTV Hook Ups for Engle in Regional Offices

Here's the situation. Right now we are planning on a tape delay for Asia/Australia/Japan. However, I'm afraid the powers that be will change their minds at the last minute because we both know this has happened before when it comes to "taping." If the we can do it, we'll have to rebroadcast it a day or two later so that we have ample time to set up and you have ample time to get your staff over to the Conrad. In the meantime, we will still be getting a lot of audio lines so that you can dial in from your homes and hear it live. I know this doesn't answer your question, but it's the best I can do.

Another question: Which hotel are you in for the regional corp affairs conference? Do you want us to try to set up a satellite feed there on a tape delayed basis?
