TO: Research Committee (RC No 769)

### Tar Measurement Standards

The attached paper (TK1021) was sent to ISO/TC 126 arising from discussion in BSI Committee PAC 11.

It is felt that the 8 points in the paper would form a suitable Agenda for discussion with the Government Chemist in the light of proposals on Tar Measurement contained in the Tar & Labelling Directives.

This will be discussed under Item 6 of the Research Committee Agenda in the meeting on Tuesday, 24 May.
